

## BLANKE NON-SLIP TREAD

The BLANKE NON-SLIP TREAD consists of an extruded aluminium profile and a PVC insert strip. It is particularly non-slip and durable. Due to the well thought through design the base profile guarantees the insert strip is seated absolutely securely. The nose in the tread area is strengthened and the rounded contours of the base profile prevent the nose being sheared off. The design of the aluminium profile is the same for all tile thicknesses.
