

BLANKE AQUA-KEIL

For the perfect detail solution on sloping surfaces to connect with flooring with linear drainage: the BLANKE AQUA-KEIL. The stainless steel gradient edge profile is available as a left or right version.

The perfect finish: the deep-drawn moulded part BLANKE DIBA-KEIL (see page 100) or BLANKE DISK-KEIL (see page 106) for reliable waterproofing of the transition from screed to the wall.

11.0	32.0	755-280B-110-R	85.35
12.5	32.0	755-280B-125-R	85.68

Advantages:

- > The unique inclined profile for connection in linear drains
- > Simple installation with 2% gradient
- > No complicated inclined cutting of the floor tiles is required
- > Other inclines can be realised through different tile thicknesses
- > Right and left versions
- > Guiding tip: Left and right version when looking towards linear drain

Attention:

It is essential to ensure that the waterproofing membranes (e.g. BLANKE DIBA, BLANKE DISK) are never damaged by BLANKE AQUA-KEIL (see figure 1). Different gradients can for example be compensated by the tile thickness.
